Work experience

📅 12/2020 – PRESENT 📍 JERSEY CITY, USA

Software Engineer II Goldman Sachs

- **IMD Conflicts** | Made design decisions and supervised the development work of 2 direct reportees for this React.js based app where the sales team can onboard business proposals to check for conflicts of interest
- **Mentorship** | Buddy to 2 interns and Acclimation Mentor to a full-time analyst supporting their way into the firm

📅 04/2019 – 12/2020 📍 JERSEY CITY, USA

Software Engineer I Goldman Sachs

- **Content Tool** | Conceptualized, proposed and led the development of a full stack web app using Node.js, React.js, Java and other in-house tools to automate fact card generation thereby saving the firm an estimated ~\$1.5 million / year
- **Fixed Income Automation** | Single handedly interacted with users to design complex server-side code in Java to automate report generation saving 400+ days of work annually by onboarding 20+ reports over 6 months
- **Client Reporting Platform** | Led the dev work and managed 4 support staff worldwide for handling daily / monthly posting of 1000+ ETFs and MFs to GSAM.com by retrieving, aggregating and implementing biz logic to financial data
- **Fund Data** | Successfully switched report rendering for 1000+ onshore funds from a 3rd party vendor to an in-house tool with 100% result match saving the firm ~\$700,000 / year

📅 07/2014 – 05/2016 📍 BANGALORE, INDIA

Analyst and Web Developer VMware

- **SharePoint** | Developed and supported MS SharePoint applications used company-wide by 20,000+ employees
- **Infrastructure** | Led the infrastructure upgrade of MS SharePoint from version 2013 to 2016 for 5 global teams
- **Gamification** | Received the Go Getter Award for engineering a reward-based website for Worldwide Business Ops
